

REAL GRAHAM TEST SAFE & CLEAN®

System for the collection and detection of
Enterobius vermicularis eggs

REAL
Life-Science Solutions

- **CLEAN AND SIMPLE**
Ready-to-use slide
- **SAFETY CAP**
Prevents cuts and scrapes
- **EASY TO USE**
Easy instructions with pictures
- **OPTIMAL VISUALIZATION**
High-quality glass for microscopy
- **RIGID CONTAINER**
Prevents breakage during transport
- **MARKED CE IVD**
Suitable for clinical diagnosis

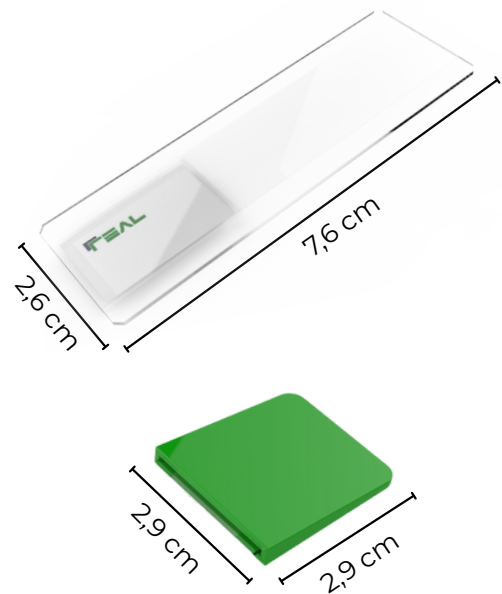

REAL GRAHAM TEST SAFE & CLEAN®

● TECHNICAL FEATURES

The slides, with ground corners to prevent cuts and abrasions, come pre-applied with ready-to-use adhesive tape. Their completely transparent glass surface offers a wide field of view and allows an optimal microscopic observation.

Each slide is provided with a flexible plastic cap that facilitates sample collection and avoids direct contact with the glass, thus ensuring the safety of the patient and the professional.

The system is supplied in a rigid, sturdy plastic case, which protects the samples during transport and ensures their integrity.
