

REAL MINI & MIDI SYSTEM TOTAL FIX®

System for the collection, transport, preservation and concentration of intestinal parasites in fecal samples

REAL
Life-Science Solutions

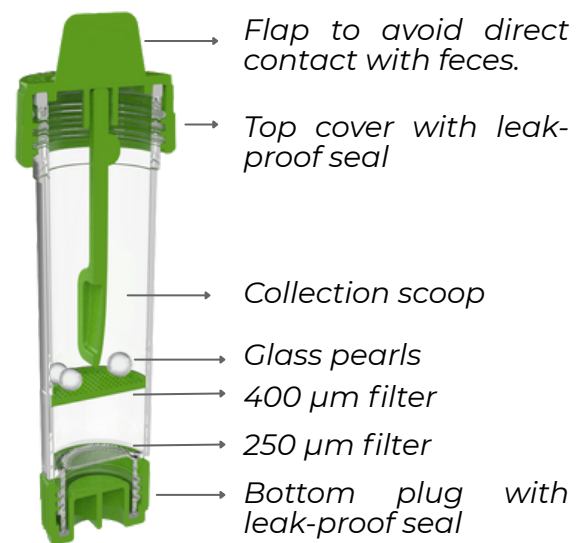

- **CLEAN AND SIMPLE**
Closed system prevents contamination
- **DOUBLE FILTER**
Prevents clogging during the filtration
- **MICROHOMOGENIZATION**
Glass beads for sample disintegration
- **SAFER FIXATIVE**
Free of formaldehyde and metal
- **UP TO 1 YEAR, NO REFRIGERATION**
Sample preserved at room temperature
- **SUITABLE FOR PCR**
Compatible with molecular techniques

REAL MINI & MIDI SYSTEM TOTAL FIX®

● TECHNICAL FEATURES

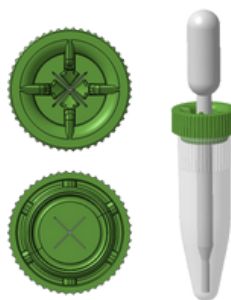

This system, made of disposable plastic, incorporates a double horizontal filter and glass beads for homogeneous sample preparation. Contains Total Fix, which has good fixing power and is formaldehyde-free, allowing for safer handling by laboratory personnel. Available in two sizes compatible with 15 ml and 50 ml centrifuge rotors. It is compatible with staining and molecular techniques, facilitating a safe and effective parasitological diagnosis.

● ACCESSORIES

Empty tube without filter
for fresh sample

Easy Pick System
with 0.9 ml Pasteur pipette

Cone plugs
for storage
